

Terraform Init Command Flow

Plug in lake download kar dega local pr

Terraform Plan Flow

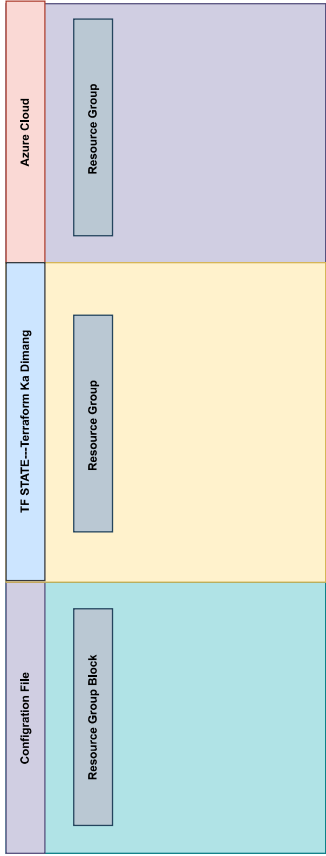

1-Jis Directory me terraform plan chahiye hai us directory ko scan karega. aur .tf file dhundega

2-Resources Block ki list banayenga

```
resource "azurem_resource_group" "fruits-block" {}
resource "azurem_storage_account" "fruits-storage" {}
```

3- kya kya banana hai ye batayenga ...lekin banayenga nhi

```
main.tf x terraform init
main.tf > ...
8 }
9
10 provider "azurerm" {
11   features {
12     subscription_id = "6b7d574e-ef48-4822-a88b-422c11c1c1c8"
13   }
14   # Configuration options
15 }
16 resource "azurerm_resource_group" "toys-block" {
17   name = "airplan-rg"
18   location = "west Europe"
19 }
20
21
```

```
